

ENTERPRISE PROJECT MANAGEMENT Overview

Cyscom Project Management solution is a ready to use product that offer the levels of easy of use, flexibility and scalability that customers look for in a Software-as-a-Service solution.

With Cyscom Enterprise Project Management, you benefit from an innovative solution that effectively manages and coordinates work ranging from one-time projects to complex programs across the entire project life cycle.

Cyscom's Enterprise Project Management (EPM) gives you robust tools with the right blend of usability, power, and flexibility, so you can manage projects more efficiently and effectively. You can stay informed and control project work, schedules, and finances, keep project teams aligned, and be more productive.

EPM lets you manage multiple types of projects, including time and materials -all in real time; also organizes your tasks, cases and events, linking them to specific projects and clients. Whether a Small to Medium sized business or a Large Enterprise, your organization can more effectively manage and coordinate work ranging from one-time projects to complex programs across the entire project life cycle by:

- ◆ Managing and control project schedules and costs
- ◆ Effectively communicating and presenting project information to workers and teams
- ◆ Achieving immediate productivity gains

Best of all, EPM manages project and client data in one, powerful, fully integrated and extensible system that is easily customizable to a business user's requirements.

Achieve immediate productivity gains

Organizations are increasingly standardizing their processes to improve operational efficiencies and more effectively manage project complexity. EPM enables you to implement repeatable processes with automated workflow, resulting in lowered costs, faster cycle times, and increased quality.

Benefits:

- ◆ Quickly master the project management process using familiar MS Office system user interfaces
- ◆ Use pre-packed, out of the box project management processes that helps you set up projects, manage tasks and resources, track status, and report project information

- ◆ Improve your project visibility and access to actionable information for effective decision making

Features:

- ◆ Project team alerts and notifications to any project status changes
- ◆ Change management system to approve project changes related to costs, time schedule, deliverables and any other change events
- ◆ Personalized dashboards that provide real-time information for managers and employees on how projects are progressing and what actions are required.

Manage and control project schedules and costs

Effectively track and analyze projects with a better understanding of the schedule and impact of changes. Obtain immediate benefits from better financial control and analytics that allow you to make pro-active decisions.

Benefits:

- ◆ Budget Tracking and Cost Resources permit better financial insight and tracking: make the most of your money and resources by tracking each job and sub-job in real time, and making adjustments as needed.
- ◆ Manage and monitor all project-related data in one system, thereby improving internal efficiency as well as client service.
- ◆ Gain visibility and insights provided by sophisticated analysis and reporting

Features:

- ◆ Track all your resources and assets in real time from a single, powerful platform.
- ◆ Create multiple project jobs or sub-jobs and link them to specific customers.
- ◆ All records include start dates, estimated end dates, percentage of work completed, actual end dates, as well as income and expenses associated with each project.
- ◆ Organize tasks, cases and events automatically, linking them to specific projects.

Effectively communicate and present project information

EPM helps you better organize work and people to help ensure projects are delivered on time and within budget.

Benefits:

- ◆ Improve the organization of your projects and people with the scheduling power and capabilities of Cyscom EPM.
- ◆ Easily report and communicate information in various formats according to the needs of stakeholders.
- ◆ Consolidate organizational knowledge from previous projects to lower project risks and re-use existing content to avoid re-work

Features:

- ◆ Get information about resource allocation for proposed projects
- ◆ Manage project documents and related content (emails, files, contracts, collateral etc.) using project libraries that store, version and approve documents.
- ◆ Individuals other than the assigned resource can provide status updates on tasks by using the Assignment Owner feature.
- ◆ Programs enable easy management of multiple sub-projects and their cross-project dependencies in a coordinated fashion.
- ◆ Milestones help track and manage project deliverables

Implementation

Cyscom's Enterprise Project Management application is provided as a hosted on-demand service, allowing you to trial the solution on a low-risk, no-cost basis to gain a rapid insight into how this powerful and easy-to-use solution addresses the management of your project activities, employee and team performance and customer support.

Further, as part of Cyscom's Application Business Catalog, EPM can be further extended with additional applications such as Contract Management, Help Desk, Salesforce (CRM), Knowledge Management, Team Workspaces and Information Lifecycle Management.

Only Cyscom gives you a single access point to the exact information your project management team need to effectively manage, monitor, control and manage support and project activities.
